ULTRASKY,
LIGHT AND WARMTH
FOR THE ULTIMATE

ORANGERY OR EXTENSION

UltraSky's revolutionary roofing system puts warmth and light at the heart of your new extension or orangery design. Guaranteed for 10 years, the market's strongest glazed roof is designed to flood your new room with light. Engineered by Ultraframe the superb thermal performance means your home will always be warm and welcoming. With an unrivalled choice of finishes inside or out, in aluminium and uPVC you can transform the way you live with a truly unique space.

ultraSky
ROOF by ultraframe

The UltraSky Roof maximises light by extending to the eaves beam rather than using a flat roof. Designed for spectacular builds up to 8m by 5.6m wide; this slimline system with super strong bars and ridge let in much more light than a traditional orangery or flat roof extension. A choice of decorative Cornices add shape and style to the roofline and hide unsightly gutters. See pages 4-5 for more details.

ultraSky
LANTERN by ultraframe

The UltraSky Lantern can be inserted into an existing flat roof or a traditional orangery deck and is ideal for large builds where the roof height is restricted. Unlike many other lanterns, UltraSky has a 25° pitch which draws more light into the room creating a stunning focal point. See pages 8-9 for more details.

“

ULTRASKY ROOF,
SIMPLE, STYLISH
& ELEGANT

ORANGERIES & EXTENSIONS

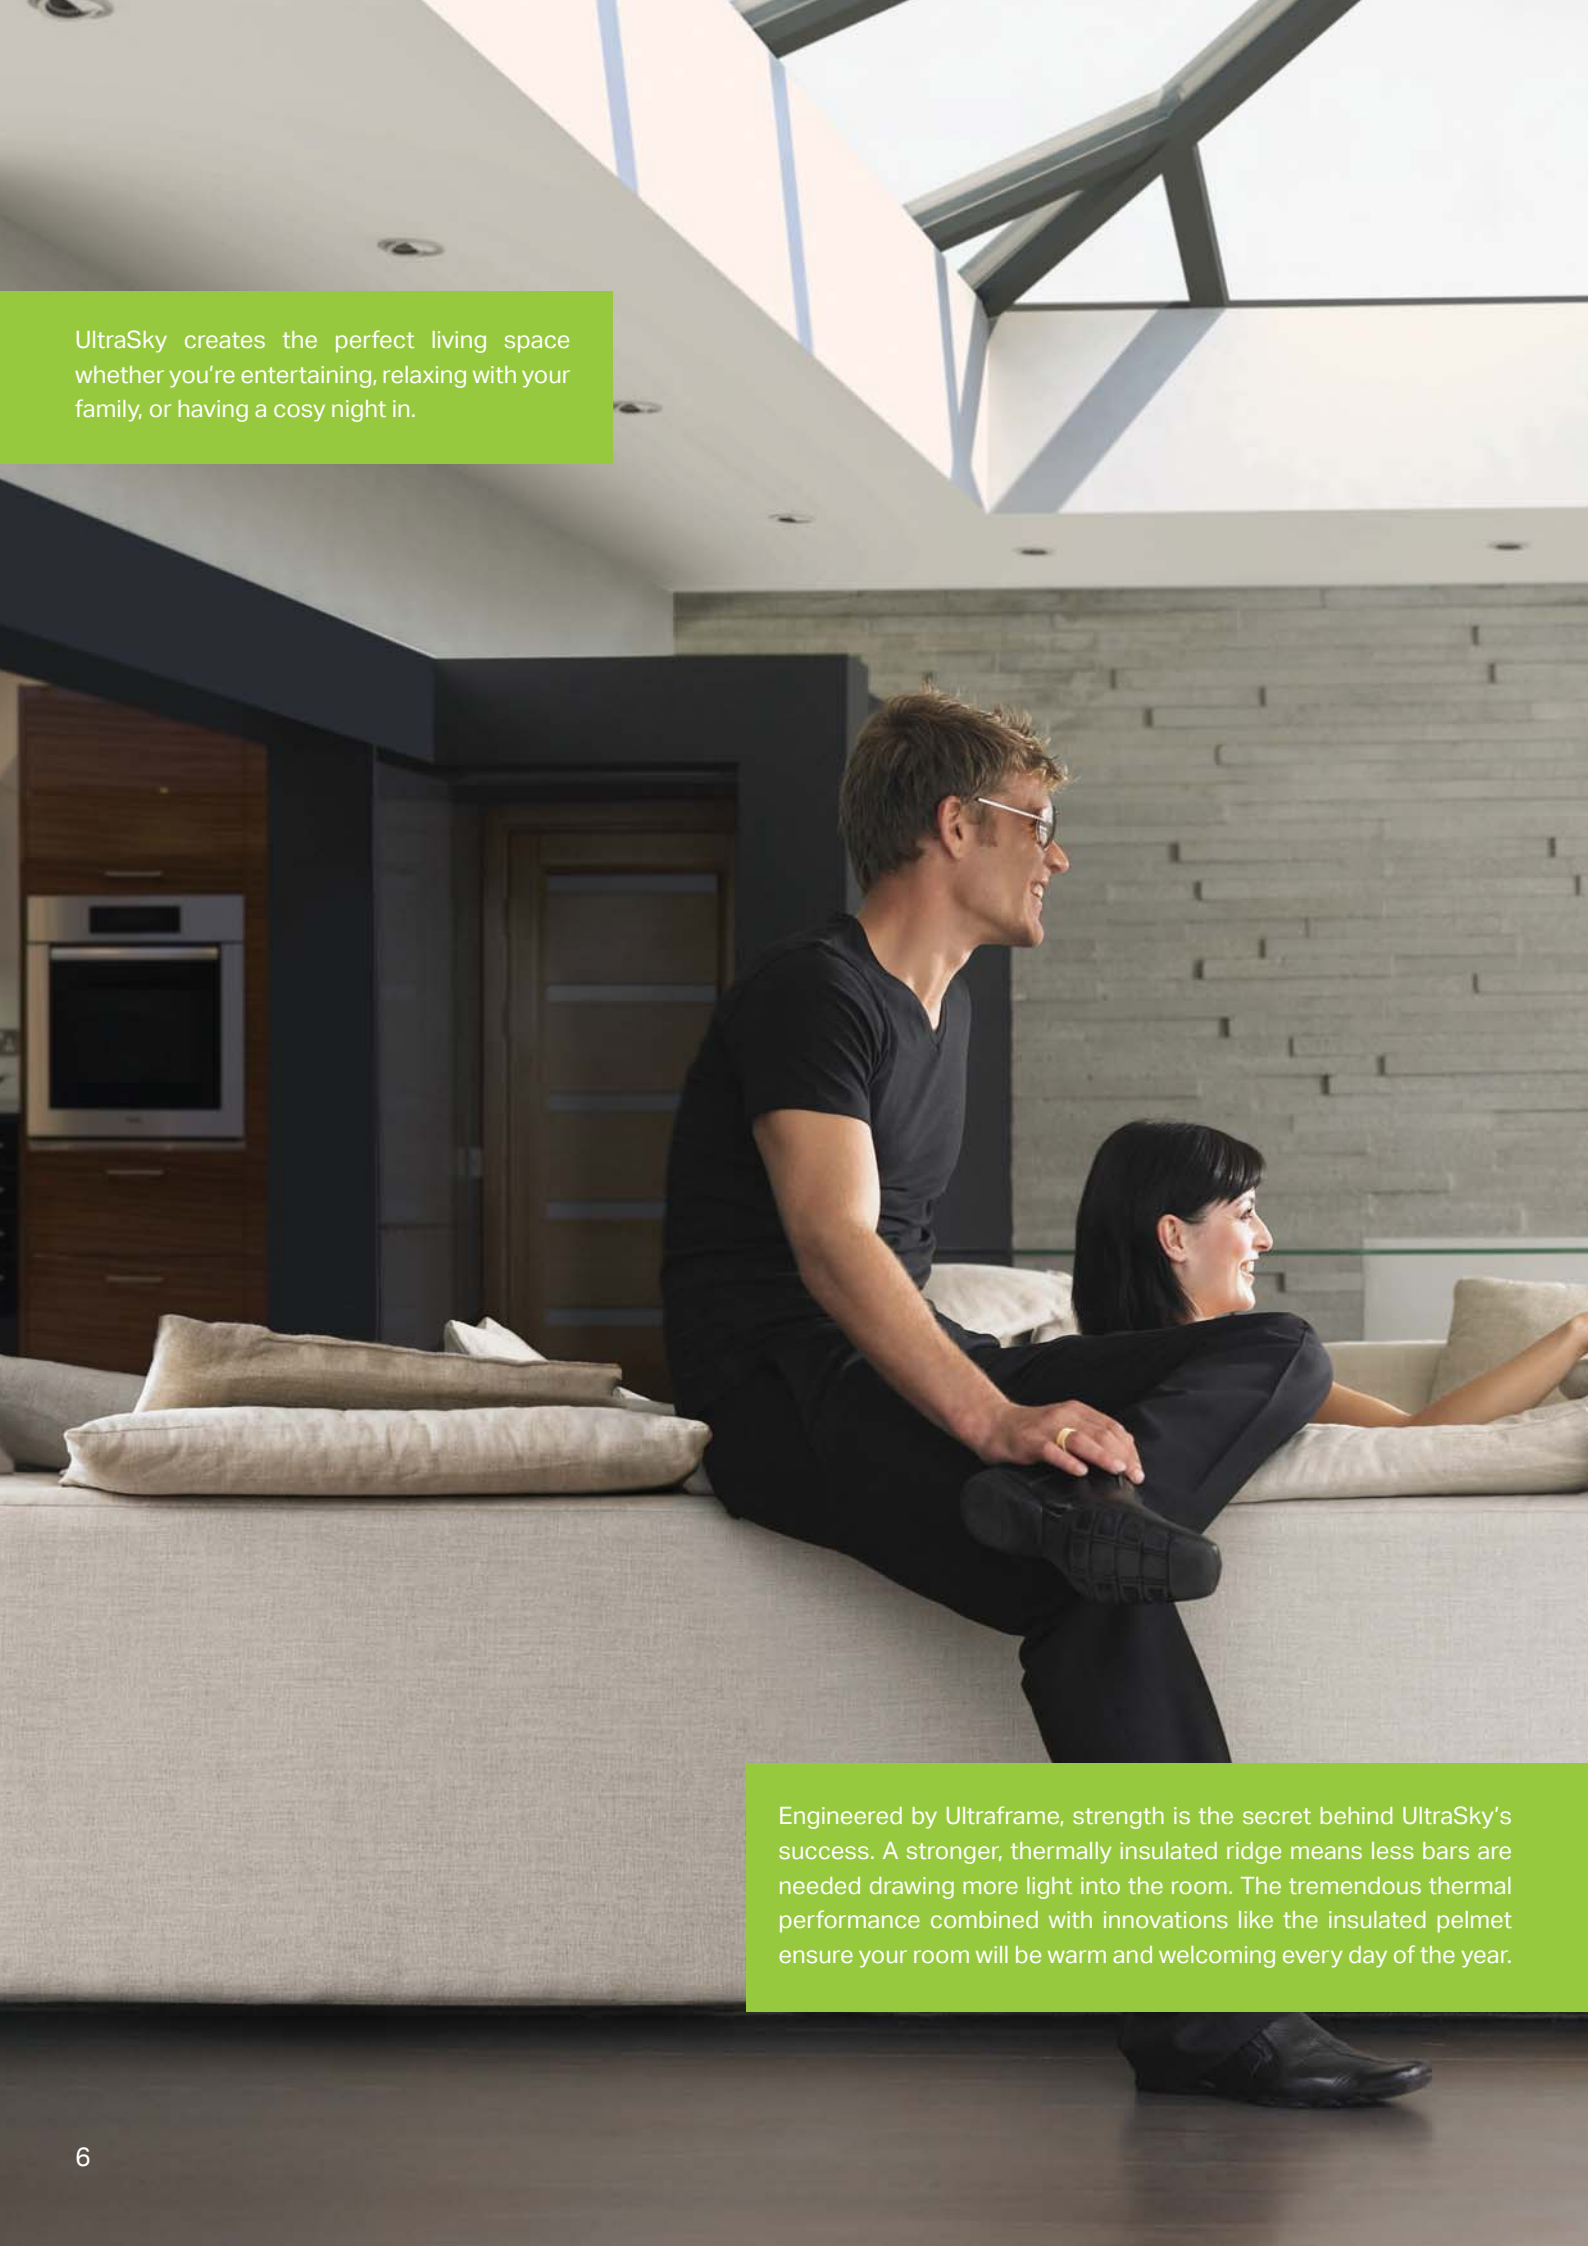

UltraSky Roof combines fresh modern styling with the natural light of a conservatory to create a beautiful warm glazed extension with the style and grandeur of a traditional orangery.

With UltraSky Roof the design options are endless. For a contemporary look, the flat Cornice available in 1, 2, or 3 tier looks amazing with bi-folds or sliding doors. Or, for a traditional orangery look, choose brick pillars, dwarf walls with our classic curved Cornice. Match a thermally insulated column to your Cornice in a bespoke colour to create something really unique.

Inside the variable width pelmet insulates the eaves and creates perimeter ceiling with a room like feel. Add spotlights or speakers to inspire and impress.

A man and a woman are sitting on a light-colored sofa in a modern living room. The man is wearing a black t-shirt and glasses, and the woman is wearing a black top and pants. They are both smiling and looking towards the right. The room features a large skylight with a dark frame, a stone wall, and a dark wood kitchen area with a built-in oven. The overall atmosphere is bright and contemporary.

UltraSky creates the perfect living space whether you're entertaining, relaxing with your family, or having a cosy night in.

Engineered by Ultraframe, strength is the secret behind UltraSky's success. A stronger, thermally insulated ridge means less bars are needed drawing more light into the room. The tremendous thermal performance combined with innovations like the insulated pelmet ensure your room will be warm and welcoming every day of the year.

ULTRASKY, IT'S
NOT JUST HOW
IT LOOKS AND
FEELS,

IT'S HOW IT WORKS!

ULTRASKY LANTERN,
LIGHTER AND BRIGHTER

ORANGERIES & EXTENSIONS

Sitting on a flat roof or traditional orangery deck, UltraSky Lantern draws maximum light into your orangery or extension.

UltraSky Lantern's extra strength means less bars and uninterrupted sight lines for maximum light. It is available in a wide variety of sizes to a maximum width of 4m and a length of 5.8m. The elegant 25° pitch to all four sides provides a stunning addition to any room - ideal for creating a focal point in a kitchen or dining room extension.

ULTRASKY ROOF
